SUMMARY

Full Stack Developer with strong WordPress and MERN stack foundation. Built 100+ production websites generating \$319,850 in revenue with 45+ third-party platform integrations across cannabis ecommerce and home services CRM systems. Expertise in performance optimization, API integrations, and advancing from Junior to Senior Developer through technical growth and client success.

EXPERIENCE

Senior Web Developer

Range Marketing

June 2023 - Present, Remote

- Designed, built, and launched 100+ WordPress sites using custom themes and plugins, generating \$319,850 in revenue through client collaboration on functionality and user experience (July 2023 - May 2025).
- Promoted from Junior to Senior Web Developer based on performance, and technical growth.
- Implemented 30+ third-party platform integrations including cannabis ecommerce systems (Dutchie, Blaze, Dispense) and home services CRM platforms (HouseCall Pro, ServiceTitan, Roofle).
- Ensure high Google PageSpeed scores (90+ average) and ADA compliance through performance optimization and accessibility best practices.
- Provided ongoing maintenance, and post-launch support, working closely with Project Coordinators, and Sales teams pre and post launch.
- Built documentation library and restructured team documentation processes.

Administrative Aide

NYS Assembly

October 2015 - May 2018, Buffalo, NY

- Managed and maintained Constituent Relationship Management database with data migration.
- Developed and designed campaign websites and managed NYS Assembly web presence.
- Created digital call log systems, transferring data from paper records to databases.
- Executed digital marketing campaigns and managed print and online materials.
- Compiled and analyzed constituent data to support legislative initiatives.
